

## PRAYER IN THE FOUR DIRECTIONS

**Facing East:** O Creator God, Maker of all that is, who always has been. May the rising sun remind us of you who gives us great wisdom and strength. Help us, your people, as we walk your sacred path in life, so that our generations to come will have light as they walk your path. For the rays of the rising sun in the east:

We Thank You, Our Creator. Hiy Hiy.

**Facing South:** O Good Creator, you send us soft winds and rains from the south. May goodness be always in our hearts and gentleness in our speech. We are reminded of the things that make us happy in this life - friends, family, and you, O great power and source of all life. Help us to walk with you always. For the soft winds and rains that comes from the south:

We Thank You, Our Creator. Hiy Hiy.

**Facing West:** Creator of the setting sun, we send our voices up to you. We pray, Great Spirit, that our journey through life may know the harmony and rhythm of the setting sun. We pray that we may look longingly toward the sunset of our life, and feel your greatness and beauty within us. For the sun's brilliance as it sets in the west:

We Thank You, Our Creator. Hiy Hiy.

**Facing North:** Great God, our Creator, our eyes are turned towards you where you speak to us from the north. You are power over the harshness of our lives, stormy winds and great drought. You are the Great One who calms our fears and anxieties. Give us strength and courage to walk the strong winds in life by walking with you. For the protection you provide for us:

We Thank You, Our Creator. Hiy Hiy.
